BIBLIOGRAPHY — LARS ONSAGER[1]

1925

[1] En undersøkelse av absorbtions-spektra ved lave temperaturer. *Diplomoppgave.* Kjemiavdelingen, Norges tekniske høiskole.

1926

[2] Zur Theorie der Elektrolyte. I. *Phys. Z.* **27**, 388–392. Berichtigung, *ibid.* **28**, (1927) 276.

1927

[3] Zur Theorie der Elektrolyte. II. *Phys. Z.* **28**, 277–298.

[4] Report on a revision of the conductivity theory. *Trans. Faraday Soc.* **23**, 341–349.

1928

[5] Activity coefficients and mass-action law in electrolytes. *J. Phys. Chem.* **32**, 1461–1466.

1929

[6] Simultane irreversible processer. (Abstract.) *Beretning om det 18. Skandinaviske Naturforskermøde i København 26.–31. August 1929*, Frederiksberg Bogtrykkeri, Copenhagen, pp. 440–441.

1930

[7] Simultaneous irreversible processes. (Abstract.) *Phys. Rev.* **35**, 666.

1931

[8] Reciprocal relations in irreversible processes. I. *Phys. Rev.* **37**, 405–426.

[9] Reciprocal relations in irreversible processes. II. *Phys. Rev.* **38**, 2265–2279.

1932

[10] Irreversible processes in electrolytes. Diffusion, conductance, and viscous flow in arbitrary mixtures of strong electrolytes. *J. Phys. Chem.* **36**, 2689–2778. (With R. M. Fuoss.)

[11] Viscosity and particle shape in colloid solutions. (Abstract.) *Phys. Rev.* **40**, 1028.

1933

[12] Theories of concentrated electrolytes. *Chem. Rev.* **13**, 73–89.

1934

[13] The surface tension of Debye-Hückel electrolytes. *J. Chem. Phys.* **2**, 528–536. (With N. N. T. Samaras.)

[14] Deviations from Ohm's law in weak electrolytes. *J. Chem. Phys.* **2**, 599–615.

[1] Printed discussion remarks by Onsager at conferences and symposia are listed separately.

1935

[15] Solutions of the Mathieu equation of period 4π and certain related functions. *Ph.D. thesis.* Department of Chemistry, Yale University.

1936

[16] Electric moments of molecules in liquids. *J. Am. Chem. Soc.* **58**, 1486–1493.

1938

[17] Initial recombination of ions. *Phys. Rev.* **54**, 554–557.

1939

[18] Electrostatic interaction of molecules. *J. Phys. Chem.* **43**, 189–196.

[19] On the theory of isotope separation by thermal diffusion. *Phys. Rev.* **55**, 1083–1095. (With W. H. Furry and R. C. Jones.)

[20] Separation of gas (isotope) mixtures by irreversible processes. (Abstract.) *Phys. Rev.* **55**, 1136–1137.

[21] Theory of isotope separation by thermal diffusion. (Abstract.) *Phys. Rev.* **55**, 1137. (With W. H. Furry and R. C. Jones.)

[22] Turbulence in convection in gases between concentric vertical cylinders. *Phys. Rev.* **56**, 474–477. (With W. W. Watson.)

1940

[23] Separation of isotopes by thermal diffusion. (Abstract.) *Phys. Rev.* **57**, 562.

1942

[24] Anisotropic solutions of colloids. (Abstract.) *Phys. Rev.* **62**, 558.

[25] Crystal statistics. (Abstract.) *Phys. Rev.* **62**, 559.

1944

[26] Crystal statistics. I. A two-dimensional model with an order-disorder transition. *Phys. Rev.* **65**, 117–149.

1945

[27] Theories and problems of liquid diffusion. *Ann. N. Y. Acad. Sci.* **46**, 241–265.

[28] The distribution of energy in turbulence. (Abstract.) *Phys. Rev.* **68**, 286.

1947

[29] Transition points. *Report International Conference on Fundamental Particles and Low Temperatures, Cambridge, July 1946*, vol. 2, The Physical Society, London, pp. 137–144. (With B. Kaufman.)

1948

[30] De Haas-van Alphen effect in zinc. (Abstract.) *Phys. Rev.* **74**, 1235. (With J. E. Robinson.)

1949

[31] The effects of shape on the interaction of colloidal particles. *Ann. N. Y. Acad. Sci.* **51**, 627–659.

[32] Crystal statistics. III. Short-range order in a binary Ising lattice. *Phys. Rev.* **76**, 1244–1252. (With B. Kaufman.)

[33] Statistical hydrodynamics. *Nuovo Cim. Suppl. 2 (9)* **6**, 279–287.

[34] Apparatus for isotope separation by thermal diffusion. *Rev. Scient. Instrum.* **20**, 924–927. (With W. W. Watson and A. Zucker.)

1952

[35] Interpretation of the de Haas-van Alphen effect. *Phil. Mag. Ser. 7* **43**, 1006–1008.

[36] A general theory for the Gouy diffusion method. *J. Am. Chem. Soc.* **74**, 6066–6074. (With L. J. Gosting.)

[37] Kinetic theory and statistical mechanics. *Lecture notes, Yale University*, compiled by D. E. Harrison, Jr., New Haven. Unpublished manuscript in Kline Memorial Library, Yale University, New Haven.

1953

[38] Fluctuations and irreversible processes. *Phys. Rev.* **91**, 1505–1512. (With S. Machlup.)

[39] Fluctuations and irreversible processes. II. Systems with kinetic energy. *Phys. Rev.* **91**, 1512–1515. (With S. Machlup.)

[40] Diamagnetism in metals. *Proceedings of International Conference in Theoretical Physics, Kyoto and Tokyo, September 1953*, Science Council of Japan, Tokyo, pp. 669–675.

[41] Introductory talk [on liquid helium]. *Proceedings of International Conference in Theoretical Physics, Kyoto and Tokyo, September 1953*, Science Council of Japan, Tokyo, pp. 877–880.

1955

[42] Conductance of strong electrolytes at finite dilutions. *Proc. Natl. Acad. Sci. USA* **41**, 274–283. (With R. M. Fuoss.)

1956

[43] Bose-Einstein condensation and liquid helium. *Phys. Rev.* **104**, 576–584. (With O. Penrose.)

1957

[44] Wien effect in simple strong electrolytes. *J. Phys. Chem.* **61**, 198–215. (With S. K. Kim.)

[45] The relaxation effects in mixed strong electrolytes. *J. Phys. Chem.* **61**, 215–229. (With S. K. Kim.)

[46] Conductance of unassociated electrolytes. *J. Phys. Chem.* **61**, 668–682. (With R. M. Fuoss.)

1958

[47] The kinetic term in electrolytic conductance. *J. Phys. Chem.* **62**, 1339–1340. (With R. M. Fuoss.)

[48] Low temperature fluctuations. *Proceedings Fifth International Conference on Low Temperature Physics and Chemistry, Madison, Wisconsin, August 1957*, ed. J. R. Dillinger, University of Wisconsin Press, Madison, pp. 119–121. (With J. L. Lebowitz.)

[49] Many-electron wave function. (Abstract.) *Bull. Am. Phys. Soc.*, Series II, **3**, 146.

1960

[50] Proton magnetic resonance spectrum of propane. *J. Chem. Phys.* **32**, 67–71. (With D. R. Whitman, M. Saunders, and H. E. Dubb.)

[51] Surface specific heat of an isotropic solid at low temperatures. *J. Chem. Phys.* **33**, 1452–1461. (With M. Dupuis and R. Mazo.)

[52] The electrical properties of ice. *Rendiconti della Scuola Internazionale di Fisica "Enrico Fermi", Corso X, Varenna, 1959*, Nicola Zanichelli, Bologna, pp. 294–315. (With M. Dupuis.)

1961

[53] Magnetic flux through a superconducting ring. *Phys. Rev. Lett.* **7**, 50.

[54] Thermodynamic potentials of symmetrical electrolytes. *Proc. Natl. Acad. Sci. USA* **47**, 818–825. (With R. M. Fuoss.)

[55] Statistical mechanics course. *Lecture notes, Yale University*, compiled by Robert Hill. Unpublished manuscript in Kline Memorial Library, Yale University, New Haven.

1962

[56] The conductance of symmetrical electrolytes. I. Potential of total force. *J. Phys. Chem.* **66**, 1722–1726. (With R. M. Fuoss.)

[57] The electrical properties of ice. *Vortex* **23**, 138–141.

[58] The electrical properties of ice. *Electrolytes*, ed. B. Pesce, Pergamon Press, Oxford, pp. 27–46. (With M. Dupuis.)

1963

[59] The conductance of symmetrical electrolytes. II. The relaxation field. *J. Phys. Chem.* **67**, 621–628. (With R. M. Fuoss.)

[60] The conductance of symmetrical electrolytes. III. Electrophoresis. *J. Phys. Chem.* **67**, 628–632. (With R. M. Fuoss.)

[61] Mechanism for self-diffusion in ice. *Proc. Natl. Acad. Sci. USA* **50**, 208–210. (With L. K. Runnels.)

[62] Helium II. *The Many-Body Problem. Proceedings Symposium, Stevens Institute of Technology, Hoboken, New Jersey, January 28-29, 1957*, ed. J. K. Percus, Interscience, New York, pp. 457–464.

1964

[63] A correction to the Poisson-Boltzmann equation for unsymmetrical electrolytes. *J. Am. Chem. Soc.* **86**, 3421–3423.

[64] The conductance of symmetrical electrolytes. IV. Hydrodynamic and osmotic terms in the relaxation field. *J. Phys. Chem.* **68**, 1–8. (With R. M. Fuoss.)

1965

[65] Electrons in liquids. *Modern Quantum Chemistry. Istanbul Lectures 1964*, Part 2, ed. O. Sinanoğlu, Academic Press, New York, pp. 123–128.

[66] Electrons in metals. *Modern Quantum Chemistry. Istanbul Lectures 1964*, Part 2, ed. O. Sinanoğlu, Academic Press, New York, pp. 265–278.

[67] Zur Theorie des Wieneffekts in schwachen Elektrolyten. *Z. Phys. Chem. (Leipzig)* **228**, 428–432. (With C. T. Liu.)

[68] The conductance of symmetrical electrolytes. V. The conductance equation. *J. Phys. Chem.* **69**, 2581–2594. (With R. M. Fuoss and J. F. Skinner.)

[69] Protonic semiconductors. (Unpublished.)

1966

[70] Integrals in the theory of electron correlations. *Ann. Phys. (Leipzig)* 7. Folge **18**, 71–77. (With L. Mittag and M. J. Stephen.)

1967

[71] Ferroelectricity of ice? *Ferroelectricity. Proceedings Symposium, Warren, Michigan, September 1966*, ed. E. F. Weller, Elsevier, Amsterdam, pp. 16–19.

[72] Thermodynamics and some molecular aspects of biology. *The Neurosciences. A study program*, eds. G. C. Quarton, T. Melnechuk, and F. O. Schmitt, Rockefeller University Press, New York, pp. 75–79.

[73] Ion passages in lipid bilayers. *Science* **156**, 541.

1968

[74] Relaxation effects in associating electrolytes. *J. Am. Chem. Soc.* **90**, 3134–3140. (With S. W. Provencher.)

1969

[75] The motion of ions: principles and concepts. *Les Prix Nobel en 1968*, Norstedt & Söner, Stockholm, pp. 169–182. (Also published in *Nobel Lectures. Chemistry 1963–1970*, Elsevier, Amsterdam, 1972, pp. 272–288, *Science* **166**, 1359–1364 and *Angewandte Chemie* **81**, 1009–1016.)

[76] Diffusion and relaxation phenomena in ice. *J. Chem. Phys.* **50**, 1089–1103. (With L. K. Runnels.)

[77] Protonic semiconductors. *Physics of Ice*, eds. N. Riehl, B. Bullemer, and H. Engelhardt, Plenum Press, New York, pp. 363–368.

[78] The conductivity of strong electrolytes at finite dilution. (Abstract.) *Proc. Natl. Acad. Sci. USA* **63**, 228–229. (With M.-S. Chen.)

1970

[79] Possible mechanisms of ion transit. *Physical Principles of Biological Membranes. Proceedings Coral Gables Conference, 1968*, eds. F. Snell, J. Wolken, G. Iverson, and J. Lam, Gordon and Breach, New York, pp. 137–139.

1971

[80] The Ising model in two dimensions. *Critical Phenomena in Alloys, Magnets and Superconductors*, eds. R. E. Mills, E. Ascher, and R. I. Jaffee, McGraw-Hill, New York, pp. 3–12.

[81] Autobiographical commentary by Lars Onsager. *Critical Phenomena in Alloys, Magnets and Superconductors*, eds. R. E. Mills, E. Ascher, and R. I. Jaffee, McGraw-Hill, New York, pp. xix–xxiv.

1973

[82] Introductory lecture [on ice]. *Physics and Chemistry of Ice*, eds. E. Whalley, S. J. Jones, L. W. Gold, Royal Society of Canada, Ottawa, pp. 7–12.

1974

[83] Life in the early days. *Quantum Statistical Mechanics in the Natural Sciences. Coral Gables Conference, 1973*, eds. S. L. Mintz and S. M. Widmayer, Plenum Press, New York, pp. 1–14.

[84] The effects of wall charge on the capillary rise of electrolytes. *Quantum Statistical Mechanics in the Natural Sciences. Coral Gables Conference, 1973*, eds. S. L. Mintz and S. M. Widmayer, Plenum Press, New York, pp. 167–200. (With E. Drauglis.)

[85] Surface specified heat of crystals. I. *Quantum Statistical Mechanics in the Natural Sciences. Coral Gables Conference, 1973*, eds. S. L. Mintz and S. M. Widmayer, Plenum Press, New York, pp. 227–279. (With T. Y. Moon.)

[86] Interpretation of kinetic and equilibrium properties. *Structure of Water and Aqueous Solutions. Proceedings International Symposium, Marburg, July 1973*, ed. W. A. P. Luck, Verlag Chemie, Weinheim, pp. 1–7.

[87] Asymptotic forms for luminescent intensity due to donor-acceptor pair recombination. *J. Phys. C: Sol. Stat. Phys.* **7**, 645–648. (With A. M. Stewart.)

[88] Hopping of ions in ice. *J. Chem. Phys.* **60**, 405–419. (With M.-S. Chen, J. Bonner, and J. Nagle.)

1975

[89] Electrons and vortex lines in He II, I. Brownian motion theory of capture and escape. *J. Phys. A: Math. Gen.* **8**, 203–213. (With J. McCauley, Jr.)

[90] Electrons and vortex lines in He II, II. Theoretical analysis of capture and release experiments. *J. Phys. A: Math. Gen.* **8**, 882–890. (With J. McCauley, Jr.)

1977

[91] The integral representation of the relaxation effects in mixed strong electrolytes in the limiting law region. *J. Phys. Chem.* **81**, 1211–1212. (With S. K. Kim.)

[92] The generalized conductance equation *J. Phys. Chem.* **81**, 2017–2021. (With M.-S. Chen.)

[93] Kinetic polarization deficiency in electrolyte solutions. *Proc. Natl. Acad. Sci. USA* **74**, 401–404. (With J. B. Hubbard, W. M. van Beek, and M. Mandel.)

[94] Dielectric dispersion and dielectric friction in electrolyte solutions. I. *J. Chem. Phys.* **67**, 4850–4857. (With J. B. Hubbard.)

1978

[95] Electrical effects during condensation and phase transitions of ice. *J. Chem. Phys.* **68**, 3823–3828. (With D. L. Staebler and S. Mascarenhas.)
