Bibliography — Lars Onsager 1

Lars Onsager 1903–1976 — A Biographical Memoir 9
H. Christopher Longuet-Higgins and Michael E. Fisher

[81] Autobiographical commentary by Lars Onsager 37

Nobel Presentation Speech *S. Claesson* 43
[75] The motion of ions: principles and concepts (Nobel Lecture) 46

IRREVERSIBLE PROCESSES

Onsager's reciprocal relations and thermodynamics of irreversible processes .. 61
Commentary by *P. Mazur*

[6] Simultane irreversible processer (abstract) 71
[7] Simultaneous irreversible processes (abstract) 72
[8] Reciprocal relations in irreversible processes. I. 73
[9] Reciprocal relations in irreversible processes. II. 95
[19] On the theory of isotope separation by thermal diffusion 110
[20] Separation of gas (isotope) mixtures by irreversible processes (abstract) 123
[21] Theory of isotope separation by thermal diffusion (abstract) 123
[22] Turbulence in convection in gases between concentric vertical cylinders 124
[23] Separation of isotopes by thermal diffusion (abstract) 127
[27] Theories and problems of liquid diffusion 128
[34] Apparatus for isotope separation by thermal diffusion 153
[36] A general theory for the Guoy diffusion method 157
Onsager's application for a doctoral degree at NTH *(Comment by the editors)* 166

THE ISING MODEL

The Ising model 167
Commentary by *C. Domb*
Path crossings with Lars Onsager 180
Commentary by *C. N. Yang*

[25] Crystal statistics (abstract) 182
[26] Crystal statistics. I. A two-dimensional model with an order-disorder transition 182
[29] Transition points 215
[32] Crystal statistics. III. Short-range order in a binary Ising lattice 223
[80] The Ising model in two dimensions 232

ELECTROLYTES

Lars Onsager's contribution to electrolyte theory 243
Commentary by *W. Ebeling and J.-C. Justice*

[2] Zur Theorie der Elektrolyte. I. 251
[3] Zur Theorie der Elektrolyte. II. 256
[4] Report on a revision of the conductivity theory 278
[5] Activity coefficients and mass-action law in electrolytes 287
[10] Irreversible processes in electrolytes. Diffusion, conductance, and viscous flow in arbitrary mixtures of strong electrolytes 293
[12] Theories of concentrated electrolytes 383
[13] The surface tension of Debye-Hückel electrolytes 400
[14] Deviations from Ohm's law in weak electrolytes 409
[42] Conductance of strong electrolytes at finite dilutions 426
[44] Wien effect in simple strong electrolytes 436
[45] The relaxation effects in mixed strong electrolytes 453
[46] Conductance of unassociated electrolytes 468
[47] The kinetic term in electrolytic conductance 483
[54] Thermodynamic potentials of symmetric electrolytes 485
[56] The conductance of symmetrical electrolytes. I. Potential of total force 493
[59] The conductance of symmetrical electrolytes. II. The relaxation field 498
[60] The conductance of symmetrical electrolytes. III. Electrophoresis 505
[63] A correction to the Poisson-Boltzmann equation for unsymmetrical electrolytes 510
[64] The conductance of symmetrical electrolytes. IV. Hydrodynamic and osmotic terms in the relaxation field 513
[67] Zur Theorie des Wieneffekts in schwachen Elektrolyten 521
[68] The conductance of symmetrical elctrolytes. V. The conductance equation 526
[74] Relaxation effects in associating electrolytes 540
[78] The conductivity of strong electrolytes at finite dilution (abstract) 547
[84] The effects of wall charge on the capillary rise of electrolytes 548
[91] The integral representation of the relaxation effects in mixed strong electrolytes in the limiting law region 582
[92] The generalized conductance equation 584
[93] Kinetic polarization deficiency in electrolyte solutions 589
[94] Dielectric dispersion and dielectric friction in electrolyte solutions. I. 593

ELECTRONS IN METAL

Onsager's papers on electrons in metals 601
Commentary by *A. B. Pippard*

[30] De Haas-van Alphen effect in zinc (abstract) 603
[35] Interpretation of the de Haas-van Alphen effect 604
[40] Diamagnetism in metals 607
[49] Many-electron wave functions 614
[66] Electrons in metals 615
[70] Integrals in the theory of electron correlations 629

COLLOIDS

Impact of particle shape on the physics of colloidal suspensions 637
Commentary by *H. N. W. Lekkerkerker* and *T. Odijk*

[11] Viscosity and particle shape in colloid solutions (abstract) 639
[24] Anisotropic solutions of colloids (abstract) 639
[31] The effects of shape on the interaction of colloidal particles 640

DIELECTRICS

The dielectric constant and mean electrostatic energy of molecular fluids 673
Commentary by *George Stell*

[16] Electric moments of molecules in liquids 676
[18] Electrostatic interaction of molecules 684

HELIUM II AND VORTEX QUANTIZATION

Onsager's quantization of circulation in superfluid helium 693
Commentary by *Russell J. Donnelly*

[41] Introductory talk [on liquid helium] 697
[62] Helium II 701
[89] Electrons and vortex lines in He II, I. Brownian motion theory of capture and escape 709
[90] Electrons and vortex lines in He II, II. Theoretical analysis of capture and release experiments 720

OFF-DIAGONAL LONG-RANGE ORDER AND FLUX QUANTIZATION

Off-diagonal order and flux quantization 729
Commentary by *P. W. Anderson*

[43] Bose-Einstein condensation and liquid helium 732
[53] Magnetic flux through a superconducting ring 741

TURBULENCE

Onsager's contribution to turbulence theory: Vortex dynamics and turbulence in ideal flow 743
Commentary by *A. Chorin*

[28] The distribution of energy in turbulence (abstract) 746
[33] Statistical hydrodynamics 747

ION RECOMBINATION

Onsager's contribution to reaction-rate theory 757
Commentary by *George Weiss*

[17] Initial recombination of ions 760
[87] Asymptotic forms for luminescent intensity due to donor-acceptor pair recombination 764

FLUCTUATION THEORY

Onsager and Machlup's work on fluctuations in statistical physics 769
Commentary by *Henry McKean*

[38] Fluctuations and irreversible processes 772
[39] Fluctuations and irreversible processes. II. Systems with kinetic energy 779

ICE AND WATER

Ice and related topics 783
Commentary by *John F. Nagle*

[52] The electrical properties of ice 786
[57] The electrical properties of ice 808
[58] The electrical properties of ice 811
[61] Mechanism for self-diffusion in ice 831
[69] Protonic semiconductors 834
[71] Ferroelectricity of ice? 837
[76] Diffusion and relaxation phenomena in ice 841
[77] Protonic semiconductors 856
[82] Introductory lecture [on ice] 862
[86] Interpretation of kinetic and equilibrium properties [of water] 868
[88] Hopping of ions in ice 875
[95] Electric effects during condensation and phase transitions of ice 890

BIOLOGY

Biology 897
Commentary by *John F. Nagle*

[72] Thermodynamics and some molecular aspects of biology 899
[73] Ion passages in lipid bilayers 904
[79] Possible mechanisms of ion transit 905
[83] Life in the early days 908

MATHIEU FUNCTIONS

Lars Onsager's thesis 921
Commentary by *R. Askey*

[15] Solutions of the Mathieu equation of period 4π and certain related functions 923

OTHER TOPICS

[48] Low temperature fluctuations 989
[50] Proton magnetic resonance spectrum of propane 992
[51] Surface specific heat of an isotropic solid at low temperatures 997
[65] Electrons in liquids 1007
[85] Surface specific heat of crystals. I. 1013

Onsager discussion remarks in print 1067
Reprinted discussion remarks 1070
