

Reference Group Meeting

TMA4205 Numerical Linear Algebra

19.11.2013

Present: Håkon Marthinsen, Emil Gautesen, Elisabeth Topnes.

The main topics that were brought up on the reference group meeting was:

What is good:

- Lecture log is good.
- The last lecture with repetition of the curriculum was very good.
- Good to not use its learning.
- Both positive and negative to have the exercise session right after the lecture.

How can things be improved for next year:

- Create an interactive feedback form with evaluation of the course.
- Wish more examples and more visualisation during the lectures.
- Should require TMA4212 as prior course.
- Could divide the five exercise sets into weekly exercise sets with same total amount of exercises.
- Could reward clever questions with chocolate.
- The last project was a bit too difficult.

To do:

- Post on web page that the exam is based on the learning outcome list.
